Reduced Appliance Breakdowns

- ✓ Billing Estimator
- ✓ Energy Usage Control
- ✓ Avoid Disaster
- ✓ Pinpoint Malfunctioning
- ✓ Load Balancing
- ✓ Initiatives & Savings
- ✓ CO₂ Reduction

Key Features

Energy Control

Notifications about energy-saving tips, rebates, and incentives encourage consumers to adopt energy-efficient behaviors.

Subsidy Tracker

Helps in tracking the utilization of energy under subsidy limits and alerts on threshold to avoid expense.

Fault Detection

Find out before your wiring defect leads to appliance damage, electricity leakage or devices turn on and off.

Floating Neutral

Warn users of conditions consistent with dangerous floating neutral to help confirm diagnosis.

Incorrect Configuration Alert

Highlighting anomalies in load unbalancing, solar configurations and sensors at home.

Energy-saving Program

Programs help utilities by “freeing” up energy (i.e. reducing energy use), which decreases the need to build power plants and power lines.

Extend HVAC Life

Get around-the-clock monitoring of your HVAC health and performance to ensure they are operating efficiently.

Manage Critical Equipment

Monitor your home safety in respect to neutral connections or earthing of equipments.

Solar Monitoring

Track the generation of solar energy and net units for prosumers, notification about the change in the direction of energy.

Carbon Management

Embracing energy management notifications brings you a step closer to net zero commitment by lowering CO₂ emissions.
